

# Auto Loader for 130 Crucibles

[Click here to see Autoloader in function](#)

- Unlike many other auto loaders the ELTRA system can accommodate 130 samples giving hours of unattended operation.
- The auto loader, which does not occupy any additional bench space, is mounted above the area where the balance, PC, monitor and consumables are normally situated. The crucible positions in the loader are easily accessible to the operator even from a sitting position.
- Additional samples can be added whilst the system is running and the „out of sequence“ feature will allow urgent samples to be analysed immediately. On request the loader can be delivered to accommodate more than 130 crucibles.
- All existing ELTRA induction analysers can be retrofitted with this loader, regardless their age.
- Three available models for 130, 104 and 36 crucibles.
- Absolutely reliable.
- 

The automatic furnace cleaning after each analysis eliminates the need of any manual dust cleaning of the furnace.
