

For Immediate Release:

Alpha Resources Adds Options *Increases OEM Compatible ICP-MS Supplies*

Stevensville, Michigan, October 25, 2022 – Alpha Resources LLC, the leading aftermarket supplier of consumables and reference materials, has expanded their supplies for inductively coupled plasma mass spectrometry (ICP-MS) analysis to include compatibility with two additional brands, Agilent Technologies® and PerkinElmer®. In-stock supplies include both sample cone and skimmer cone options compatible with leading models of ICP-MS analysis equipment.

This line expansion follows Alpha’s recent addition of ICP-MS supplies compatible with Thermo Fisher Scientific analysis equipment. Agilent, PerkinElmer and Thermo Fisher are the top three OEM for the ICP-MS laboratory equipment used in many industrial sectors.

“Given the size of the ICP-MS market, we had always planned on supporting equipment from multiple manufacturers. It’s a little earlier than we had planned on launching the Agilent and PerkinElmer compatible cones, but once Alpha introduced the Thermo Fisher compatible cones, we began to receive customer questions about additional OEM options,” notes Ken Mantei, Director of Operations, at Alpha Resources. “Fortunately, Alpha’s team had already been working for months to finalize a more expansive OEM compatible range of sample cones and skimmer cones. With our QA process complete and customer testing feedback in, we can confidently state that Alpha can provide cost-saving ICP-MS cones for Agilent or PerkinElmer equipment which is equal in durability to OEM cones with consistently reliable analytical output throughout their life. Exactly the kind of quality customers expect from Alpha.”

As with all Alpha products, the high-quality lab supplies are compatible for aftermarket use in the specified ICP-MS analyzers. Additional information about the expanded line of ICP-MS supplies may be found on the website, <https://www.alpharesources.com/icpms-consumables.php>.

About Alpha Resources

Founded in 1978, Alpha Resources, LLC is a global leader in the manufacture and distribution of aftermarket consumables and certified reference materials for use in atomic spectroscopy analysis. Alpha Resources is ISO17034, ISO17025, ISO9001:2015 certified.
